NEW! The Improved Distance Learning Program

We have added even more support for distance learning requests to make each day go more smoothly for your teachers and students.

1. Distance Learning Ready Educators

- Our in-house distance learning trainings prepare subs to lead virtual classrooms
- Subs are equipped to handle classroom management, attendance, and to have back up sub plans
- Subs abide by our Distance Learning Code of Conduct to deliver a successful distance learning day

2. Dedicated Tech Support

- Our team can consult with you to help decide the best process for creating log-ins for your substitute teachers

3. No-Cost Teacher Shadowing

- Swing subs can virtually shadow your teachers before their request begins. Available for long-term request at no extra cost to you.

4. Easier Communication with Subs

- Set up your teachers, principals, and other staff to coordinate and share lesson plans and log in information on Swing. You can choose which level of access each user receives.

5. Enhanced Request Details

- Once you provide the teacher information, we can auto-populate details including any special notes. We have added new fields to give you more control over what information subs know prior to the day of the assignment.
